PROFESSIONAL EXPERIENCE

Frontend Developer
University of St. Thomas / Saint Paul, MN / February 2018 - Present

- Lead designer and frontend developer for the School of Law Lawyer Search application. Responsible for analyzing requirements with the Salesforce team to design a new user interface to increase engagement with School of Law alumni *(launching December 2020)*

- Lead developer for the School of Education website redesign. Responsible for analyzing and coordinating the requirements and development tasks to ensure the staging site is ready for content migration and creation *(launching December 2020)*

- Responsible for the frontend development (HTML, SCSS) and implementation of components (Vue JS) in the University's content management system (Cascade/Velocity) to launch business.stthomas.edu, www.stthomas.edu, cape.stthomas.edu, cas.stthomas.edu

- Designed the user interface (UI) and improved the user experience (UX) of a custom mobile app (iOS) in order to deliver University applications and features to faculty, staff and students

- Take part in code reviews and pull requests (Git/Github/CodeCommit) in order to eliminate merge conflicts, improve communication and avoid deploying code that is not ready for production

- Wrote a Python script to scrape 500 pages of content from our legacy content management system (T4) and saved the web team 120 hours of work copying and pasting content manually

- Responsible for design and development that is driven by accessibility (a11y) best practices to improve the experience for users with visual or cognitive disabilities, and to be in compliance with the American's with Disabilities Act and adhere to WebAIM guidelines

- Updated the legacy codebase for a WordPress website (news.stthomas.edu) to be supported by PHP 7, then migrated the site from a server on premises to the cloud, and connected it to Cloudfront to quickly deliver more than 19,000 blog posts to users

- Converted a MySQL database from Drupal to WordPress, one table at a time, and designed a custom WordPress website (threesixty.stthomas.edu) to modernize the look and feel of the site and improve engagement with the ThreeSixty Journalism program

- Resolved 195 JIRA tickets and 99 Web Help Desk tickets in order to support University partners, and to respond quickly to bugs to keep things running smoothly

PROFESSIONAL EXPERIENCE CONT.

Owner & Frontend Developer

Angela Holden Design LLC / Minneapolis, MN / 2013 - 2018

- Successfully marketed services to small businesses and sole proprietors throughout Minnesota and in cities across the U.S.
- Offered custom WordPress web design and development, organic SEO, content writing, server setup and digital consulting
- Drafted a proposal and detailed scope of work for every project - including a budget and timeline
- Successfully completed and launched every project accepted as a freelancer and contractor
- Organized kick-off meetings, presented deliverables, and kept client's focused to avoid "scope creep"
- Invoiced and collected timely payments from clients in order to keep a roof over my head
